

Patient education solutions

We are Healthily

We specialise in patient education

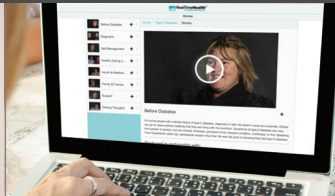

healthily.com.au

We are here to make a difference by developing **health resources**, **tools** and **programs** to build patient knowledge

Patient Narrative Library

The 'Speaking From Experience' video series has been developed in partnerships with more than 40 peak consumer health organisations, in three countries. It includes more than 800 video clips across 100+ condition titles.

GoShare Healthcare

GoShare Healthcare is a customisable content distribution platform for health professionals to easily share up-to-date, accurate and engaging health resources tailored to the needs of individual patients and carers.

Online Health Programs

We develop and deliver online health programs that leverage GoShare's content scheduling functionality and webinar technology. We offer highly scalable approaches to patient education for chronic disease self-management.

Content Production

Healthily is a full service production company with a strong focus on storytelling. Our experienced team bring high production values and creativity to your project. We work closely with you to bring your ideas to life, on time and on budget.

How we can work together

Patient Narrative Library

We have developed the largest video library of patient and carer experiences in the Asia-Pacific region. Known as Speaking From Experience, our library has been developed in partnership with more than 40 peak consumer health organisations. The series includes approximately 800 video clips across 100 health titles. It presents patient and carer experiences of a broad range of chronic conditions and wellness topics, including diabetes, osteoarthritis, heart disease, COPD, cancer, advance care planning and pain management, among others.

The participants are positive role models who share their experiences of the day-to-day challenges and strategies they use to manage their illnesses. Based on current evidence, the video series aims to improve patient self-efficacy and self-management behaviours, and empower people to play a more active role in their health care.

GoShare Healthcare

Our flagship product, GoShare Healthcare, is an intuitive online tool that makes it easy to send appropriate, timely educational resources to consumers. GoShare is a customisable content distribution platform, which enables the efficient and measurable sharing of health resources, tailored to patients' information needs.

Based on current evidence, the digital content bundles aim to improve patient self-efficacy and self-management behaviours, and empower people to play a more active role in their healthcare. GoShare is used to complement telephone and face-to-face interactions. Scheduling functionality enables tailored content to be sent automatically over a defined period of time, providing a highly scalable approach to patient education.

Online Health Programs

We design and deliver online health programs that leverage GoShare's scheduling functionality, and webinar technology. These highly scalable approaches to patient education provide an opportunity for health professionals to support their patients with health information in a format that best suits their needs and learning preferences.

With the increasing prevalence of chronic conditions, and the requirement for health professionals to support self-management, we offer a range of online health program solutions that are scalable and cost-effective.
